- Endomyces ▶ Curerex-Endo
- Saccharomyces ▶ Curerex-Saccharo

Lactic acid related products

Microbes found in dairy products

- Lactobacillus ▶ Curerex-Lacto
- Bifidobacterium ▶ Curerex-Bifido

EXTRACTION REFINING

EXTENSIN & GLYCOPROTEIN

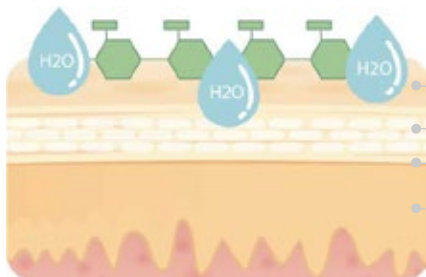

EXTENSIN

Hydrolyzed plant-derived collagen
High-concentration Hydroxyproline
High skin absorbability

The amino acid composition of extensin (vegetable collagen) is derived from plants and is similar to animal collagen

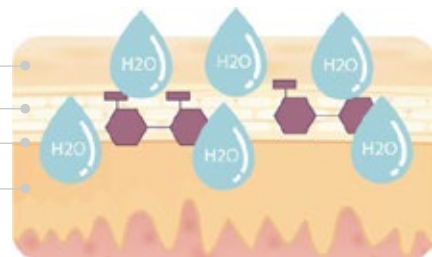

EFFICACY

Non-Hydrolyzed Extensin

Stratum corneum
Epidermis
Dermal-epidermal junction
Dermis

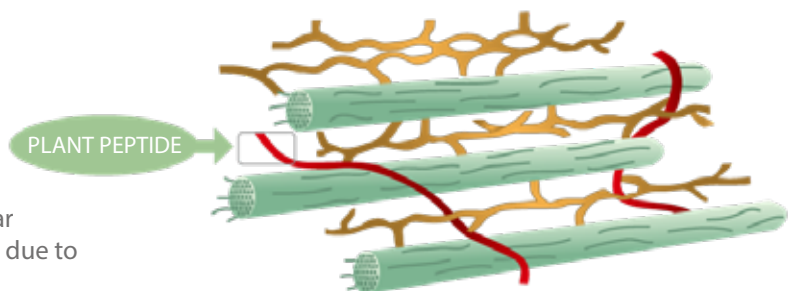

Hydrolyzed Extensin

GLYCOPROTEIN

Plant Peptide
Protein with carbohydrate
Has high absorbability

Keeps the production of collagen similar to skin's peptide and highly absorbable due to low molecular weight

POLY-SACCHARIDE

Natural Moisturizer Derived from Botanical Sources

Long Chain Polymeric Saccharides

Ex) Dextrin, Hyaluronic Acid, Glycogen, etc.

Natural polymers
Skin-friendly and safe
Moisturizing effect and emulsification stability, film formation effect
Improves the feeling as a thickening agent
With a similar water retention ability to hyaluronic acid

EFFICACY

Main Benefits of Botanical Polysaccharides

Plant-derived thickener
Plant-derived moisturizer

HIGH PURITY

High content of active component from natural plants

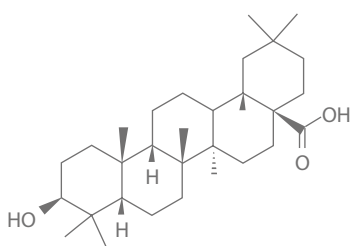

Recrystallization

High purity technology through recrystallization using differences in solubility of specific component

Olive (Leaf)

Oleanolic acid

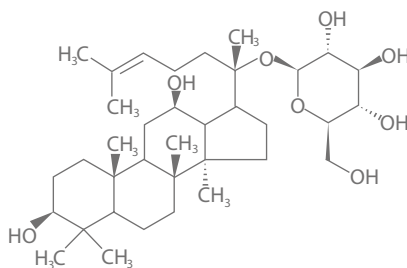

Bioconversion

Technology to increase the desired content of specific component by utilizing biological conversion

Ginseng (Root)

Compound K

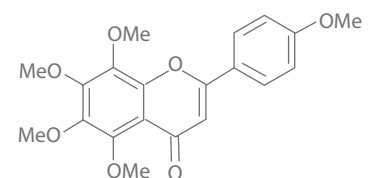

Elimination of Impurities

Technology to extract plant that contains specific ingredient and to obtain the desired component in high content by removing impurities

Citrus (Peel)

Tangeretin

OIL & BUTTER

Light feeling and alternatives to Silicone Oil
Hydrogenation Technology

Oil product development technology through advanced refining technology
and controlling of fatty acid property

OIL & BUTTER

Phytorex :

Plantester :
Plant-derived Ester Oil
Neorex :
Textured Butter

OIL

Cold Pressed
Plant-derived natural oil
Clean & Vegan Oil

Enzymatic Hydrolysis
Low-molecular : Light texture
Partially Hydrolyzed Vegetable Oil

Green Technology
Alternative Silicone Oil
Natural Ester Oil

BUTTER

Hydrogenation tech :
converts double bonds in natural
oils into single bonds
More stable and improved
oxidation stability
Retains moisture in the skin and
has a good texture

**The melting point can be
controlled between 40~60C**

so it is used in a variety of
formulations

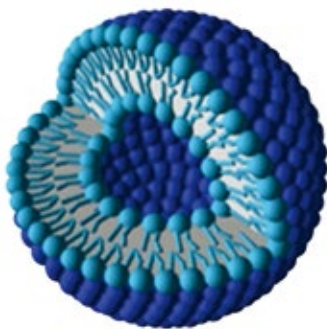

Neorex is
a partially hydrogenated
vegetable oil,
which enables various melting
points for many applications.
It offers unique textures:
from soft to hard paste.

Neorex is
less occlusive than natural/
synthetic wax and has benefits
like quick penetration and non-
irritation.

UNIMELL

THE STRUCTURE OF LIPOSOME

ADVANTAGE

- The emulsifying ingredients used in nano-emulsification, such as lecithin, are natural
- Lipophilic and hydrophilic components can penetrate the skin at the same time
- It is the most skin friendly structure

REPLENISH YOUR DAMAGED SKIN BY FORMING A SKIN BARRIER

STAVECTOR

INTRODUCTION

- Encapsulation with the skin-friendly biopolymer
- Enhances permeability into the skin
- Stabilizes active ingredients

MECHANISM

- Controlled release guarantees the active ingredients are delivered to the skin in optimum level
- Encapsulation and stabilization of the active ingredients ensure the long lasting effects
- Ingredients promote the enhanced penetration into the skin
- Skin friendly biopolymer encapsulation does no harm to skin
- The outer phase of the STAVECTOR is hydrophilic and is easy to apply to water-based formulations

SYNTHESIS

SYNTHESIS

**Pseudo
Ceramide**
NeoLux Series

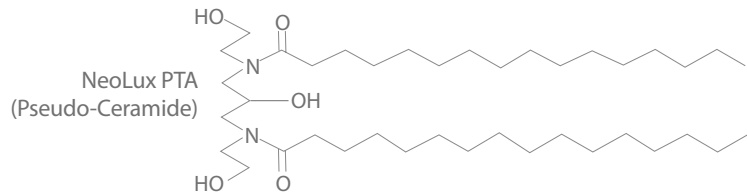

**Liquid
Crystal**
BioLux Series

**Vitamin
Ester**
NexVita Series

Pseudo Ceramide : NeoLux Series

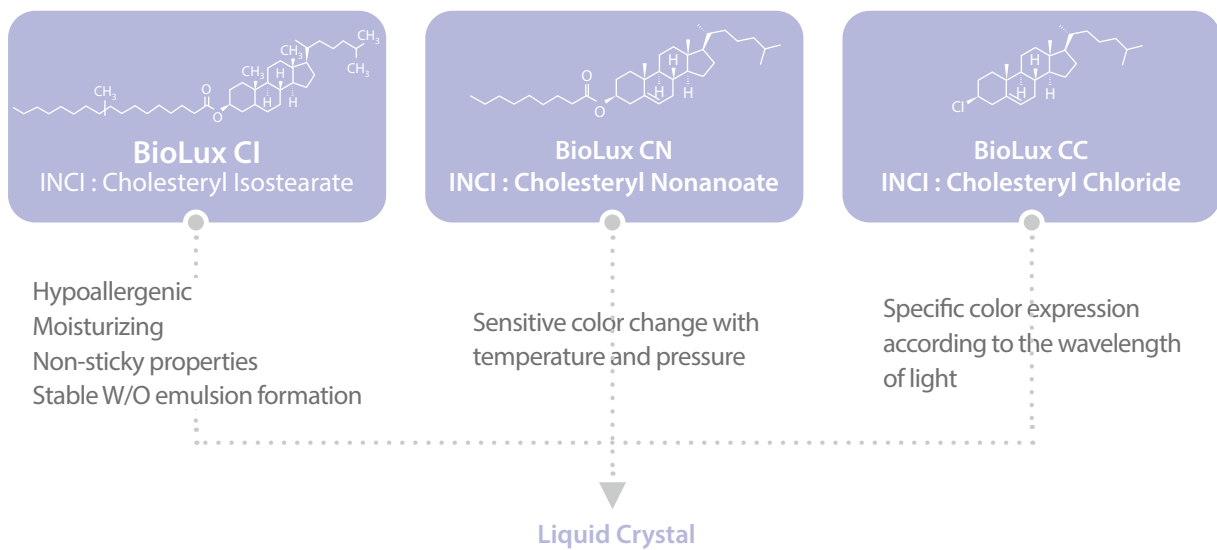

NeoLux PTA is a synthetic Ceramide made by mimicking natural ceramides
Pseudo-ceramide derived from natural fatty acids

- Low melting point
- Low price compared to natural ceramide
- Effects similar to ceramide NP

- Low melting point
- Low price compared to natural ceramide
- Effects similar to ceramide NP

BioLux series is a liquid crystal cosmetic ingredient based on cholesterol derivatives

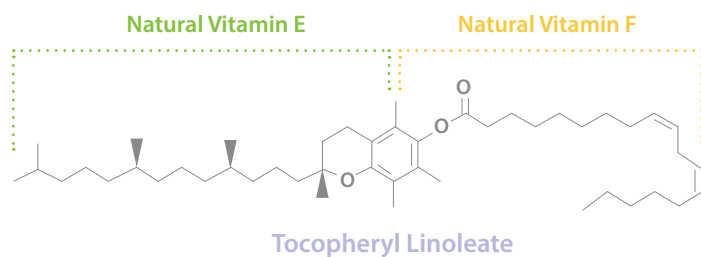

SYNTHESIS

Vitamin Ester : NexVita Series

Nexvita ENF 70 is an ester bond between natural vitamin E (D-alpha tocopherol) and vitamin F (linoleic acid).

It is a natural vitamin derivative that shows the efficacy and complex effects of vitamin F and vitamin E.

It contains anti-aging, anti-wrinkle, anti-oxidant, moisturizing and high efficacy of skin barrier and hair protection

DERMATOLOGY

In-vitro testing is essential in raw material active ingredient development
Durae corporation offers various efficacy customized to your needs
at our research center

Durae corporation can cooperate with customers to process thesis
and patents on raw materials development

Anti-Oxidant

- DPPH assay
- SOD-like activity assay

Anti-Aging

- MMP-1 synthesis assay
- Procollagen synthesis assay
- mRNA expression analysis

Whitening

- Melanin inhibition assay
- Tyrosinase inhibition assay

Moisturizing

- Hyaluronic acid synthesis assay
- mRNA expression analysis

Skin barrier

- Cornified envelope formation assay
- mRNA expression analysis

Anti-Inflammation

- Nitric oxide inhibition assay
- Inflammatory cytokine inhibition assay

Hair

- Human dermal papilla cell viability
- mRNA expression analysis

Anti-Acne

- Oil Red O staining
- Anti-p.acne efficacy

Anti-Irritation

- Cell viability
- Protein expression analysis

DURAE

We professionally produce innovative products and ideas to the global beauty and health care industry. Since our establishment in 1997, Durae Corporation has developed numerous innovative ingredients for cosmetics and personal care products. With our rapid growth every year, we have strived to improve human beauty around the globe. We develop and supply to our clients' needs and wants.

Management Philosophy

Committed to enhance human beauty and health by providing the goods and services of superior quality

Mission

We support our clients in the beauty and health industry with the very best solutions to help accomplish their successes

Vision

To become the global leading material supplier in the beauty and health industry

Durae Mindsets

prioritize our clients

We consistently provide innovative and customized solutions for our clients' successes.

pursue innovation

We precisely identify rapidly changing trends and create new solutions through rigorous R&D.

passion and responsibility

We focus on a transparent supply and development of our solutions.

aspire to be the best

The superior quality of our products and services is our competitive edge.

DURAE

Revolutionize your Skincare

Ever since 2007, Durae has been working rigorously and investing in Research & Development to provide the absolute best quality of cosmetic ingredients.
Due to our rigorous dedication to product development, Durae has garnered a number of patents used towards a wide range of skin treatment.
